

Employee Discipline in an Education Environment® (EDEE) is a research-validated staff development program for administrators and supervisors seeking to manage staff conduct and/or productivity concerns more proactively, effectively, and defensibly. This powerful multimedia program equips participants with a comprehensive framework of best practices for transforming their daily supervisory activities into opportunities to more positively impact student achievement.

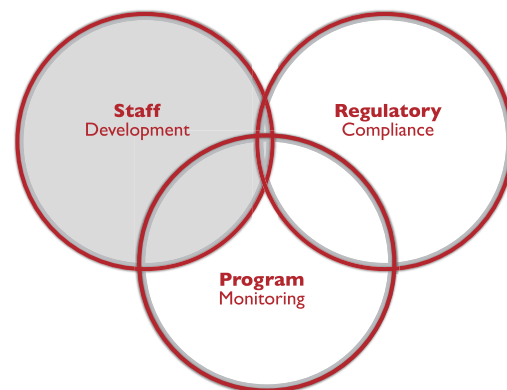

Delivered onsite, offsite, or virtually in one, two, or three day workshop formats, EDEE establishes core learning with concise attorney-led tutorials and provides dozens of opportunities to collaboratively practice new management skills and concepts using re-enactments of actual disciplinary cases from across the country. Along the way, practical implementation tools are incorporated to help put research into practice back home.

Product Benefits

- Provides direct support for accountability-related initiatives intended to increase student achievement
- Helps address staff conduct and/or productivity concerns more equitably, reasonably, and consistently
- Increases leadership capital in a frequently-cited problem area for most school leaders in which they have received little or no formal training
- Creates a context for meaningful dialogue, peer collaboration, and group problem solving around school system “pain points”
- Reduces one of the more common operational risks within the school system

RME
